DETAILED ACTION

Response to Amendment

1. The amendments and remarks presented by the applicant have been duly noted.

However, a further search and review of the prior art of record has prompted the presentation of new rejections presented below.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,9,15,18,19,20,21,22 and 23 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7,13,23 and 24 of copending Application No. 10/677,334. Although the conflicting claims are not identical, they are not patentably distinct from each other because freezer compartment, refrigerator compartment, temperature controlled chamber, cooling fan adjacent to the cool air inlet and plate damper are claimed in both applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 7,8,10 and 12-14 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/677,334 in view of Frohbieter (U.S. Patent Number 4,732,009 and 4,732,014). '334 discloses the invention substantially as claimed. Frohbieter discloses temperature sensor and drawer for temperature-controlled chamber in the same field of endeavor for the purpose of providing temperature-controlled chamber. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the apparatus of '334 with a drawer and sensor in view of Frohbieter so as to store temperature controlled items. In regard to claims 13 and 14 the location of the fan is a design choice.

This is a provisional obviousness-type double patenting rejection.

Allowable Subject Matter

5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.
